Professional Summary

Junior software engineer with full stack web experience (React, Next.js, TypeScript, Laravel) and hands-on machine learning work (scikit-learn, TensorFlow). Built a project management platform and a network monitor for clients, and trained classifiers for medical imaging and intent detection.

Education

TIMES University *Nov. 2021 – Oct. 2025*
Bachelor in Computer Science

Experience

Trainee Software Engineer *May 2026 – Present*
Information Technology Services, ITS (Xolva Department)
- Work on live projects in a dedicated environment with code integrations
- Full stack development with HTML, CSS, JavaScript, React, PHP (Laravel) and SQL

Junior Software Developer *Feb 2026 – April 2026*
PSF Prep Services
- Built an internal project management platform with Next.js, TypeScript and Firebase (see Projects)
- Automated cold email outreach and social media content creation and posting with n8n

MERN Intern *July 2025 – Sep. 2025*
Sparkosol
- Built a TODO app with MongoDB, Express, React and Node.js; learned to read and work in an existing codebase

Data Science and Machine Learning Intern *Feb. 2025 – June 2025*
Marketing Boosters
- Used scikit-learn, TensorFlow and OpenCV; ran exploratory data analysis on datasets
- Built a website chatbot and trained a breast tumor detection model

Projects

PSF Project Tracker | *Next.js, TypeScript, Tailwind, Firebase* | **Live** | **GitHub**
- Client project management platform: workspaces, role-based members, projects, tasks (board and list), subtasks, comments
- Added email invitations (Resend), check-in/check-out, audit logs and Firestore security rules; deployed on Vercel

Aster Clinic System (in development) | *Next.js, TypeScript, Vitest, Playwright* | **GitHub**
- Reusable multi-clinic booking product: a new clinic is a config folder, with no component changes
- Booking API with shared validation, a signed-session staff dashboard and a rule-based front-desk assistant
- 58 unit and 26 end-to-end tests, including automated accessibility scans

Live Network Monitor | *Python, Flask, Django* | **GitHub**
- Built with a team for a local client: tracks live status of routers, switches and firewalls across a lab network
- Sends email alerts when a device goes offline and shows device metrics and graphs

Breast Cancer Detection | *Python, TensorFlow, Keras, Flask* | **GitHub**
- Trained a DenseNet transfer-learning model on public mammograms (~95% test accuracy), with a colleague
- Built a Flask web interface where a mammogram is uploaded and classified as cancerous or not

Intent-Based Chatbot | *Python, scikit-learn, XGBoost, Flask* | **GitHub**
- Compared SVM, Logistic Regression, Random Forest, Naive Bayes and XGBoost; best ~81% cross-validated
- Served the trained classifier through a Flask chat interface

Certifications

Data Analysis with Python | freeCodeCamp | **View credential** *2024*
Scientific Computing with Python | freeCodeCamp | **View credential** *2024*
Responsive Web Design | freeCodeCamp | **View credential** *2025*

Technical Skills

Languages: Python, JavaScript, TypeScript, PHP, SQL, HTML/CSS
Web: React, Next.js, Node.js, Express, Laravel, Flask, Django, Tailwind CSS
Data & ML: scikit-learn, TensorFlow, Keras, OpenCV, XGBoost, pandas, NumPy, Matplotlib, Seaborn
Databases & Tools: SQL, Supabase, MongoDB, Firestore, Git, GitHub, Vercel, n8n, Vitest, Playwright
